

Sir,

I watch this video about their communication rights. The deaf/hard of hearing people have been a very impatient, cuz they have been waiting too long to receive the relay service. The F.C.C. could not be control with our deaf/hard hearing's needs. The F.C.C. should be provide to them to be fair as the hearing people. We did grateful to F.C.C. have the Sorenson VP100 cuz they love and comfort it. But They may not appericate it for controlling within the limits UNFAIR with the hearing people. We want to be fair with the hearing people cuz, the hearing people can be answering anything. We want to be the same as the hearing world.

Also, F.C.C. should be more hiring for ASL interpreters in the three divisions in the United States. So, we don't need to be waiting too long and also It should be involved with 911 and would be much easier and service faster for hearing people.

No More secrets from F.C.C. we have the rights to know what is going on from F.C.C.

Thanks,

Cliff
